

Telecommunications Systems Engineer

(Job Qualifications/Specifications)

Gloucester County is seeking a qualified Communication Systems Engineer to oversee, coordinate, and develop the County's information systems including the Public Safety Answering Point (Emergency Response 911 Dispatch) sites, all County departments, voice and data connectivity for NJ State Judicial group and shared services for other County entities.

Candidate should have hands on working and programming knowledge of large Avaya phone and voice mail systems both TDM and IP, experience with 911 call taker systems, preferably Sentinel for Avaya and Vesta 4, experience with outside plant cable and fiber optic both voice and data, general knowledge of IP Video Conferencing, Security Surveillance Video Camera systems, FA and BA Alarms, as well as excellent management and people skills for working with a diverse customer base.

BA degree preferred but not required as experience can be substituted year for year in lieu of education. In addition to education requirement, a minimum of five (5) yrs experience in the coordination of system development tasks including design, integration and formal testing, oversight of all transitions into production, development and completion of actions in system specifications, technical and logistical requirements and other disciplines.
